Breathe in the Difference

Breathe Healthier

GeneralAire® Evaporative Humidifier Models 3200 & 4200
Residential Whole-House
(With MHX3C: GFI #5800 & 5950; With GFX3: GFI #5801 & 5951)

Improve Health

Protect Assets

Enhance Comfort

Reduce Furnace Energy Costs

A Whole-House Humidifier:
• Treats Your Whole House 24 / 7 / 365
• Requires Minimal Maintenance
• Is Out of Sight
• Runs Quietly
Winter months mean drier indoor air.

When the air in your home is too dry, you know how unpleasant it can be.

**Health concerns**
The right humidity levels keep your sinuses and throat healthy, reducing the incidents of cold, flu, respiratory infections, allergies, asthma, and bloody noses. Studies show that humidity that’s too low contributes to the flu virus surviving longer, while simultaneously increasing its ability to spread from one person to another.

**Dry, itchy, cracked skin**
Dry air causes your skin to dry as well, and left untreated can cause anything from minor discomfort to cracked, bleeding skin.

**Temperature discomfort**
Dry air causes air to feel cooler than it really is, leading you to turn up the thermostat. The result is even drier air and a higher heating bill. Adding humidity saves money.

**Damage to your home and assets**
Dry air pulls moisture from your home’s wood framing, trim, flooring, and furniture. Expensive artwork and musical instruments can become damaged. Dry air causes gaps between ceilings and walls, letting in cold winter air and increasing the cost of your heating bill.

**Static shock**
When the air is too dry, static electricity begins to build up. This can cause blankets and clothes to stick together and, more importantly, cause painful electric shocks when you touch a doorknob or another metal surface. Static shocks can damage expensive electronics.
