The Only Residential UV Air Purifiers With An FDA Approval As a Class II Medical Device

2124-Z
The Zephyr
UNIQUE SECOND WIND™ OFFERING

Second Wind UV Air Purifiers are the only residential UV air purifiers in the market carrying an FDA Approval as a Class II Medical Device. As a Class II medical device you, the homeowner can, with a prescription from your Doctor, submit the cost of the purifier to your insurance company (your Doctor must assign the proper insurance code for an air purifier device and include this on the prescription slip).

To file a Medicare claim, you must include the following:

FROM YOUR DOCTOR (The Medicare Provider):
1. A doctor’s prescription with their NPI # and the proper insurance code for the Second Wind™ device# including FDA device code K980745. The prescription must include a description of why the device is needed listing the applicable ICD-10 billing code # (e.g. Allergy Code# 477.9; Asthma Code# 493.90).

FROM YOUR CONTRACTOR:
2. An itemized bill for the device from your installing contractor.
3. A statement from the installing contractor on their company letterhead indicating: “We are not nor do we want to become a Medicare provider”.

FROM MEDICARE.COM:
4. The patient’s completed request form CMS-1490S for medical payment. The form is entitled “Patient’s Request for Medical Payment”.

Send the above original paperwork (keep copies for your own records) to Medicare (address based on your location IE: Florida, New York).
- A response will be sent within 90 days.
- A summary will be sent within 150 days.
- Medicare does not guarantee payment. Decisions regarding reimbursement are made at the sole discretion of Medicare.
- Any missing information will prompt the return of the application.

The sunlight that we enjoy acts as a purifier for outdoor air, killing and breaking down many of the pathogens in the air that can harm us. When we are inside our homes, we don’t have that natural purifier cleaning our air. **Second Wind takes action where the sun can’t reach, purifying your home’s indoor air.**

INDOOR POLLUTANTS

In studies conducted by the EPA, it has been found that indoor levels of pollutants may be between 50% and 99% higher than outdoor levels.

---

**SECOND WIND™ UV AIR PURIFIERS**

Second Wind™ UV Air Purifiers decompose germs, bacteria, E-coli, viruses, mold, mildew, and VOC’s. They also reduce odors, making your home clean, fresh, and healthy.
