

Remove Harmful Particulates From Indoor Air.

Installing a GeneralAire® Perfect Platform reduces allergy and asthma symptoms and improves other chronic health conditions adversely affected by harmful particulates in your home's air.

How The Perfect Platform Air Cleaner Works:

Air passes through the Perfect Platform, where particulates are captured within the fibers of the MERV 11 filter media. The air leaving your Perfect Platform is healthier and safer for your family.

Install An Air Cleaner In Your Home To:

Reduce Allergy Symptoms:

Pollen and dust are major allergens that can cause miserable symptoms such as a runny nose, itchy eyes, sneezing and more. Skin flakes, urine and saliva from pets can all become airborne. The Perfect Platform removes all these and more.

Improve Your Health:

Studies show poor indoor air quality is linked to heart disease, high blood pressure, cancer, diabetes, asthma, Alzheimer's, and many more chronic diseases. Ensure good health with a quality air cleaner.

GeneralAire® Perfect Platform Air Cleaner

Perfect Platform Quality Construction

- Utilizes heavy 22 gauge galvanized sheet metal, die cut for smooth edges.
- Riveted cabinet offers sturdiness and long life.
- Includes a MERV 11 filter.
- MERV 13 filters also available.

Perfect Platform Advantages

- Space saving design for vertical installations keeps the furnace elevated off the floor.
- Ideal for those seeking relief from allergy or asthma triggers, tobacco smoke, pet dander, and mustiness.
- Removes dust, dust mites, pet dander, pollen, and other airborne particulates as small as 0.01 Microns.
- Eliminates the possibility of dust, pet hair, insects, rodents, water, or sewer backup from entering the furnace.
- Hydrophobic (resists moisture) filter media.
- Allows furnace to work at maximum efficiency and extends life of furnace by providing even air flow distribution across bottom. Especially ideal for high efficiency furnaces, where side returns require more installation time and are inefficient compared to a bottom return.
- Allows filter to work at maximum efficiency by eliminating need for transition deflectors or turning vanes, thereby saving installation time and costs.
- Helps protect and prolong the operating efficiency of the heating and cooling system.

Perfect Platform Maintenance

Maintenance of your new GeneralAire® Perfect Platform is minimal. To ensure peak performance, simply replace the filter media once each 6-12 months. Go to www.generalfilters.com / support / video library to watch a video demonstrating your filter replacement.

The Comprehensive Approach to Indoor Air Quality

Creating a healthy indoor air environment requires a comprehensive approach; one that eliminates harmful pollutants and sources of discomfort in your home. Humidity control, air purification, and particulate removal are equally important components of that plan.

Contact your local contractor to learn more about how to create a healthier and more comfortable home for you and your family. Visit us at www.generalfilters.com for more on indoor air quality.
