Dehumidifier Hanging Kit Instructions

⚠ WARNING: INSTALLATION OR MAINTENANCE OF THE DEHUMIDIFIER MUST BE PERFORMED BY A QUALIFIED SERVICE TECHNICIAN. THE SERVICE TECHNICIAN MUST USE THE PROPER TOOLS AND EQUIPMENT AND BE LICENSED BY THE PROPER AUTHORITY WHERE APPLICABLE. INSTALLATION OR SERVICE WORK PERFORMED BY AN UNQUALIFIED PERSON COULD RESULT IN HAZARDS TO THAT PERSON, OTHER PEOPLE AND PROPERTY. THESE HAZARDS COULD INCLUDE, BUT ARE NOT LIMITED TO, ELECTRIC SHOCK, FIRE, SEVERE BURNS, DAMAGE TO DEHUMIDIFIER COMPONENTS AND OTHER HAZARDS.

⚠ ***Before starting to hang the dehumidifier, please shut off the unit and make sure the dehumidifier power cord is unplugged. Failure to follow the warnings and instructions may result in electric shock and/or serious injury. A two-person team is recommended.***

Components from the kit

Tools needed: drill or impact driver with 5/16 socket, level.

Step 1 – Locate the hanging holes in the upper corner of each end (Figure 1).

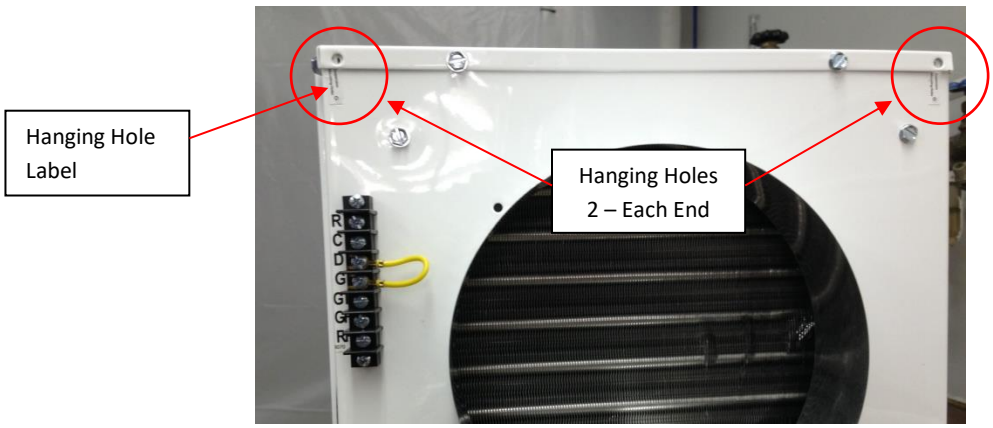

Figure 1

Step 2 – Secure the Hanging Strap to the dehumidifier with a #10 x 3/4" screw (Figure 2) using a 5/16 socket in a drill or impact driver. NOTE: use the end of the Hanging Strap with only 1 hole. Repeat the process for the other 3 Hanging Straps.

⚠ ***The screw must be securely seated and must pass through both the Top Cover and End Wall.***

Step 3 – Secure the Hanging Strap to the desired structure with a #10 x 1-1/4" screw using a 5/16 socket in a drill or impact driver (Figure 3). Any of the 3 holes in the Hanging Strap can be used for the installation. Use a bubble or straight level to ensure the dehumidifier is level in all directions.

⚠ ***The installer is responsible for selecting the structure capable of holding the dehumidifier. The screws securing the Hanging Strap to the structure must be fully seated to the structure. Failure to install the dehumidifier level may affect performance and drainage of condensate.***
